Test	SAT
Date	10/04/2018

If you have any questions about your scores, interpreting this report, or how you can improve, please call Summit Educational Group at (800) 698-8867.

Total Score Range	1200 - 1260
Likely Total Score	1230

Section Scores (200-800)

Reading and Writing Range	590 - 650
Likely Score	620

Math Range	580 - 640
Likely Score	610

Test Scores (10-40)

Reading	30
Writing and Language	32

Math	30.5
-------------	-------------

Subscores (1-15)

Standard English Conventions	10
Expression of Ideas	12
Words in Context	12
Command of Evidence	11

Heart of Algebra	11
Passport to Advanced Math	9
Problem Solving & Data Analysis	12

Cross Test Scores (10-40)

Analysis in History/Social Studies	30
---	-----------

Analysis in Science	31
----------------------------	-----------

Interpreting Your Score Report

Components of the SAT

The SAT has been heavily redesigned both in content and in the way scores are calculated and presented. The test has three primary components — Reading, Writing & Language, and Math — each with a varying number of questions and a specific time allotment. Every correct answer yields one raw point. There is no longer a “guessing penalty,” so students should avoid leaving any question unanswered. Raw scores for similar areas of content and skills are then converted to scaled test scores and subscores. The test includes an optional essay — recommended for all Summit students — that is read by two readers, who each assign scores from 1–4 in three different categories of assessment.

Scoring Framework

The maximum Total Score is 1600 and is the sum of two Section Scores: Reading & Writing, and Math. Previously, SAT scores were reported in three sections — Critical Reading, Writing (including a required essay), and Math — with a maximum of 2400 combined. The redesigned SAT consolidates the verbal elements into one Section Score, and then reports the two Section Scores on a scale of 200–800. Also reported are Test Scores that allow you to see your performance in Reading versus Writing & Language. Subscores across seven different measures provide feedback on specific academic skills. Cross-Test Scores are indicators of ability on content and skills that are tested across all areas of the exam.

Comparing Scores from the new SAT, old SAT, and ACT

Caution must be applied when comparing scores from the new SAT to the old SAT and to the ACT. The College Board's Concordance Tables are based on initial studies conducted in advance of the March 2016 sitting and confirmed by March scores. The result is often a 20-80 point "bump" when new SAT scores are compared to old scores. Comparisons to the ACT should be done with CollegeBoard's latest concordance or Score Converter app or website.

Answer Breakdown

In the Answer Breakdown you can identify your incorrect answers and how they clustered on the exam, because the section and number are highlighted in red. In the Your Answer column: a + indicates a correct answer; a - indicates that you left the question blank; a letter A–D or a number indicates your incorrect answer (the correct answer is in the column to the left).

Item Type and Difficulty

The Item Type and Difficulty analyses presents your relative performance in the different question subjects and types. The % of Possible column is your raw points divided by the total raw points possible on those questions. While it is natural to see a decline in % of Possible as difficulty increases, steep drop-offs in the percentages (more than 50% in one level) are indications of problems with timing or testing strategy.

If you have any questions about your scores, this report, the questions you answered incorrectly, or improvements you can make, please call us and ask to speak to a Program Director.
